

Projet C# : Formulaire d'inscription pour des sorties d'escalade en falaise.

L'interface graphique :

The screenshot shows a web form titled "Inscription sortie falaise". It is divided into two main sections. The top section contains input fields for "Nom", "Prénom", "Age" (with a spinner), and "Email", followed by a "Valider les informations" button. To the right of these fields is a "Savez-vous assurer ?" section with radio buttons for "Oui" and "Non", and checkboxes for "En moulinette" and "En tête", followed by a "Valider" button. The bottom section is titled "Plus d'information" and contains a "Le récap" button, a question "Avez vous déjà fait de l'escalade ?" with radio buttons for "Oui" and "Non", a "Votre niveau :" dropdown menu, and another question "Savez-vous grimpper en tête ?" with radio buttons for "Oui" and "Non".

Le code :

```
using System;
using System.Collections.Generic;
using System.ComponentModel;
using System.Data;
using System.Drawing;
using System.Linq;
using System.Text;
using System.Threading.Tasks;
using System.Windows.Forms;
```

```
namespace Projet_perso
{
    public partial class Form1 : Form
    {
        public Form1()
        {
            InitializeComponent();
        }

        string[] tabNoms = new string[300];
        string[] tabPrenom = new string[300];
        string[] tabAge = new string[300];
        string[] tabEmail = new string[300];
        int inscrit;

        private void Form1_Load(object sender, EventArgs e)
        {

        }
    }
}
```
